State of Good Repair

- Protecting and maintaining what we have is how we ensure continued functioning of the transportation system.
- Assets in most critical condition are first in line for repairs across all modes.
- Major state of good repair projects include the $1.5 billion Light Rail Modernization – the first major improvement in the Light Rail's 30-year history.

- Investments in the Port of Baltimore and BWI Marshall help grow revenues to support Maryland's economy.
